*Data included herein are updated figures that may differ from the FY 2017 USTC Annual Report (October Release). Whereas data in the October Release were considered preliminary and subject to change through December 2017 (when annual accreditation reports are finalized and submitted to the Council on Occupational Education), data herein are final for all reporting purposes pertaining to FY 2017.

†Certificate-seeking students are counted once in each accredited program in which they enroll. Hence, a student who completes an accredited program and enrolls in a separate program (e.g., completion of Certified Nursing Assistant and subsequent enrollment in Surgical Technology) is counted twice herein.

‡Note that graduation rates reported to the Council on Occupational Education differ from those shown here due to methodological differences. Whereas COE instructs accredited institutions to remove allowable subtractions prior to the calculation of graduation rates, the rates presented herein are calculated prior to the removal of allowable subtractions.

§Non-graduate completers, under direction received from the Council on Occupational Education, include those students who exit their programs of study without obtaining an accredited certificate but obtain employment in a field related to instruction received consequent to the students' studies at the technical college. This category also includes students who leave a program unsuccessfully but enroll at another institution of higher education where an articulation agreement exists, allowing students' coursework to fulfill program requirements elsewhere.

¶Students documented to be unavailable to earn a credential in their program(s), or to be placed in employment, due to situations such as pregnancy, other serious health-related issues (physical/mental/behavioral), caring for ill family members, incarceration, death, service with a foreign aid organization of the U.S. Government (e.g., Peace Corps), an official church mission, etc.

**Job Upgrade students are currently employed in a field related to the instruction received, enrolling in (a) course(s) belonging to an accredited program with the intent to *advance* in the workplace. Continuing Occupational Education students are also employed, but they enroll in stand-alone courses with the intent to *maintain* their current employment (e.g., required recertification).
